Course Outline	<p>This course covers two years, before and after participating in practice teaching. We will recognize the significance of practice teaching and will consider the meaning of learning in the position of teaching. In pre-practice teaching guidance, first we will observe lessons at our cooperating schools in order to learn the significance of practice teaching and awareness of basic issues. Based on lesson observation reports, we will perform activities for preparing to participate in practice teaching, such as creating lesson plans, developing lessons, or paying attention to the students' understanding. In post-practice teaching guidance, we will share our experiences of the practice teaching through creating reports and giving presentations based on the teaching experience.</p>
