概要	Professional Presentations is a practical course for building presentation skills. It covers not just delivery skills, but how to clearly organize content. Review sections after every four units and a final longer presentation ensures students have ample opportunity to put what they've learned into practice. Covers all three main skills of making a presentation—content, delivery, and visual aids—in each unit, which allows learners to stay current with all three skills as well as review and build upon what they have already learned. Sections on organizing speech and developing contents give students the tools to powerfully express themselves. Pair activities, group work and peer evaluation help motivate and encourage students to succeed.						
到達目標	By actively taking part in this course you learn and practice presentation skills that will enable you to stand in front of an audience. By the end of this course, you will have the skills, experience and confidence to make truly successful presentations.
