| 概要 | Problem Based Training (PBT) is a new type of study. It aims to improve students' creative thinking and ability to solve practical problems to cope with challenges in areas of global business, crosscultural communication, local business development and international affairs, etc. Students' task is to identify problems in the society based on their independent thinking and discuss with classmates to find solutions to the problems. | | | | | | | | |
| 到達目標 | As a new type of study, PBT focuses on developing and improving students' ability to identify pr oblems and find solutions to the problems. After the course, students will have abundant experie nce and skills of problem solving. Students will gain different perspectives by exchanging views with classmates. Students will also acquire creative thinking ability and teamwork spirit. These a re very useful qualities when they go to the society. | | | | | | | | |
